B1
A2
 first connector means for releasably interconnecting said first and second frame halves when said second frame half is in the ship orientation, said first connector means being integral with said first and second frame halves; and

second connector means for securely interconnecting said first and second frame halves only when said second frame half is in the install orientation said second connector means also being integral with said first and second frame halves.

(A6)

Claim 3, line 1, after "claim" insert --1--

-7- (Amended)

A3
 A window frame comprising:

a first frame half;

a second frame half including a ship orientation and an install orientation with respect to said first frame half, said second frame half being moved between the ship orientation and the install orientation by turning said second frame half within its own plane;

first connector means unitary with said first and second frame halves for releasably interconnecting said first and second frame halves; and

second connector means unitary with said first and second frame halves for securely interconnecting said first and second frame halves, said second connector means operative only when said second frame half is in the install orientation.

-13- (Amended)

A4
 A window frame comprising:

 205
 first frame half including a plurality of barbs monolithically formed with said first frame half; and

BL
 215
 a second frame half including a plurality of receivers monolithically formed with said second frame half, said second frame half having both a ship orientation and an install orientation with respect to said first frame half, said second frame half being moved between the ship and install orientations by rotating said second frame half within its own plane, each of said receivers receiving one of said barbs only when said second frame half is in the install orientation to securely interconnect said first and second frame halves.

-18- (Amended)

as
 A window frame comprising

a first frame half;

a second frame half having a ship orientation and an install orientation with respect to said first frame half, said second frame half being interchangeable between the ship and install orientations by rotating said second frame half within its own plane;

first connector means for releasably interconnecting said first and second frame halves when the second frame half is in the ship orientation, said first connector means including first and second portions monolithically formed with said first and second frame halves, respectively; and

second connector means for essentially permanently interconnecting said first and second frame halves only when said second frame half is in the install orientation, said second connector means being inoperative when said second frame half is in the ship orientation, said
